

Lead AWS Connect Specialist

Machine Learning • 3 - 8 Years • FullTime • India

Role Overview

We are looking for a highly skilled **Lead Engineer – Amazon Connect** to design and build intelligent, AI-powered customer experience solutions on AWS. This role requires strong hands-on expertise in **Amazon Connect, AWS serverless architecture, Python development, and GenAI integrations** to deliver scalable, secure, and automated contact center systems. You will work closely with business stakeholders, lead technical implementations, and drive AI-enabled customer engagement platforms.

Key Responsibilities

- Design and implement **Amazon Connect contact flows** (chat, routing, concurrency, IVR)
- Develop backend logic using **AWS Lambda (Python)**
- Architect scalable solutions using **DynamoDB, IAM, and KMS**
- Integrate **GenAI / LLM-based solutions** into chat and voice workflows
- Build and integrate **chatbots and third-party AI frameworks**
- Enable AI-driven automation and agent-assist capabilities
- Ensure security, compliance, and performance optimization
- Collaborate with stakeholders to translate business requirements into technical solutions
- Provide technical leadership and guide development teams

Required Skills

- Strong hands-on experience with **Amazon Connect (Chat, Contact Flows, Routing, Concurrency)**
- Deep knowledge of **AWS (IAM, Lambda, DynamoDB, KMS)**
- Strong **Python development** experience (mandatory)
- Experience integrating **GenAI / LLM models (OpenAI, Bedrock, etc.)**
- Hands-on experience with **chatbot frameworks and conversational AI platforms**
- Understanding of serverless and cloud-native architecture
- Strong stakeholder communication and team leadership skills
