

SIMPLE DEVELOPER DOCUMENT: HOTEL, TAXI & RESTAURANT APIs + GLEAN AGENT INTEGRATION

=====

This simple guide includes:

1. Hotel Booking API (Booking.com via RapidAPI)
2. Taxi Booking API (Uber Sandbox)
3. Restaurant & Food Ordering API (Zomato API)
4. How to test APIs as a developer
5. How to integrate APIs with Glean Agents

1. HOTEL BOOKING API (Booking.com via RapidAPI)

- Auth: API Key
- Docs: RapidAPI Booking.com

Steps:

1. Create RapidAPI account.
2. Subscribe to Booking.com API.
3. Copy your X-RapidAPI-Key.
4. Use it in your headers.

Example:

GET /v1/hotels/search

Headers:

X-RapidAPI-Key: YOUR_KEY

2. TAXI BOOKING API (Uber Sandbox API)

- Auth: OAuth 2.0
- Docs: Uber Developer Portal

Steps:

1. Create Uber Developer account.
2. Create app, obtain Client ID, Secret.
3. Implement OAuth.
4. Use Sandbox endpoints.

Example:

GET /v1.2/products (Sandbox)

Headers:

Authorization: Bearer ACCESS_TOKEN

3. RESTAURANT & FOOD ORDERING API (Zomato)

-
- Auth: API Key
 - Docs: Zomato Developers

Steps:

1. Create account.
2. Generate API key.
3. Add `user-key` header.

Example:

GET /v2.1/search?q=pizza

Headers:

user-key: YOUR_KEY

4. HOW TO TEST THE APIs

Use:

- Postman
- curl
- Thunder Client

Checklist:

- ✓ Correct key/token
- ✓ Correct endpoint
- ✓ Correct params
- ✓ JSON valid

5. USING WITH GLEAN AGENTS

Steps:

1. Create backend API wrapper.
2. Add wrapper as Custom Action in Glean.
3. Define inputs and outputs.
4. Authorize action.
5. Agent can now call API.

Example Tools:

- search_hotels
- estimate Ride
- search_restaurants
